Education

Harcourt Butler Technical University (HBTU) Aug. 2024 – May 2028
Bachelor of Technology in Civil Engineering — CGPA: 7.05 / 10 *Kanpur, India*

Experience

AI Engineering Intern Jun. 2026 – Jul. 2026
Kinetic Sage Technologies *Noida, India*

- Built AI-powered backend services in Python, FastAPI and LLM APIs to automate business workflows.
- Developed a RAG pipeline for document Q&A: ingestion, chunking, vector search and LLM response generation.

GenAI Data Analytics Virtual Intern May 2026
Tata Group (Forage) *Remote*

- Executed exploratory data analysis on large-scale financial datasets using generative AI, identifying high-risk delinquency indicators with 100% data-integrity validation.
- Designed a predictive-modeling framework and an agentic-AI collections strategy for stakeholder risk reports.

Projects

Algorithmic Trading Signal Predictor | *Python, Scikit-Learn, Pandas, NumPy, SQLite, yfinance* GitHub

- Designed a leakage-controlled evaluation for 68,000+ hourly OHLCV rows across 15 NSE equities: audited 53 candidate features down to 51 stationary ones, then walk-forward CV with a 50-hour purge window.
- Compared 8 classifiers on identical folds and reported accuracy, F1 and recall separately (tuned Bagging 91.2% accuracy; Naive Bayes 0.99 recall) rather than a single headline score.

DSA Layered Study System | *React 18, Vite 5, JavaScript, GitHub Actions* GitHub | Live

- Built a zero-backend React SPA serving a 19-module, 76-lesson DSA curriculum at 4 difficulty tiers, with a dependency-gated module graph, spaced-repetition review and timed drill modes.
- CI with GitHub Actions: schema-validated lesson JSON, ESLint 9 and automatic GitHub Pages deploys.

My Neural Space & GreekG Assistant | *Flutter, Supabase, Python, faster-whisper, Ollama* MNS | GreekG

- Cross-platform productivity OS with real-time Supabase sync and Google Calendar REST integration.
- Offline Windows voice assistant: on-device Whisper STT, local-LLM grammar cleanup and wake-word trigger.

Positions of Responsibility

Technical Associate, ACE HBTU: surveying & computation workshops, 50+ students *Aug. 2025 – Dec. 2025*
Associate, Callidus Community: coordinated Youth Parliament, Debathons & Mock Trial *Aug. 2025 – Present*
Associate, Cultural SubCouncil: sponsorship outreach for annual cultural fest, Adhyaay *2025 – 2026*

Technical Skills

Languages: Python, C++, JavaScript, Dart, SQL
Machine Learning: Scikit-Learn, Pandas, NumPy, PyTorch, Feature Engineering, Ensembles, Cross-Validation, EDA
NLP, LLMs & Vision: LangChain, CrewAI, RAG, Vector Search, Prompt Engineering, Whisper, YOLOv8, OpenCV
Web & App: React 18, React Router, Vite, Next.js, FastAPI, Flutter, Supabase, Streamlit, REST APIs
Tools & Foundations: Git, GitHub Actions (CI/CD), Docker, Jupyter, asyncio, DSA, OOP

Certifications & Achievements

Certifications: Kaggle (Machine Learning, Time Series, Deep Learning); Generative AI End-to-End (TuteDude)
Achievements: 210+ DSA problems on LeetCode and GFG (Codolio); author of a 76-lesson open-source DSA course
